Computer Science Student | .NET & Web Developer & Node.js |  
Building Scalable Applications  
El Mansoura, Ad Daqahliyah, Egypt

## Summary

I am a Computer Science student passionate about creating practical and scalable software solutions.

My core expertise is in .NET development (WPF, WinForms, ASP.NET MVC, Web API), with additional experience in Node.js, Express, and React for building modern web applications.

I enjoy working with databases and frameworks like SQL Server, MongoDB, Entity Framework Core, and LINQ, focusing on performance and clean architecture.

I'm particularly interested in developing POS systems, inventory management tools, and AI-powered applications that bring real value to businesses.

Always eager to learn, experiment with new technologies, and grow into a professional software engineer.

---

## Education

Mansoura University

High School Diploma, Computer Science · (2021 - 2026)
